

Sentinel — Government-Feed Output Report

Generated 2026-09-05 19:24:28 UTC · Gujarat Police Innovation Challenge 2026 · Model 2 · Live Sentinel sandbox feed

Summary

932 TOTAL DETECTIONS	755 PLAUSIBLE PLATE READS	2 WATCHLIST ALERTS	6 CAMERAS ONBOARDED
-------------------------	------------------------------	-----------------------	------------------------

Cross-camera trace evidence: no plate has yet been confirmed on two different cameras (checked exact + OCR-confusion-variant matching across all plausible-length plates). Strongest trace evidence to date: plate **BV2807** detected 4 times on camera(s) cam12, correctly linked across OCR-confusion variants (see trace_demonstration.md for full detail).

Known false positive: 1 detection(s) below are the video overlay's own burned-in timestamp/caption text, not a vehicle plate — kept in the table rather than deleted, so this remains a complete record of every real detection event (highlighted in red).

Detections
