Summary

100038
TOTAL DETECTIONS

85529
PLAUSIBLE PLATE READS

108
WATCHLIST ALERTS

22
CAMERAS ONBOARDED

Confirmed single-camera trace: plate **BV2807** detected 6 times on camera(s) cam12, correctly linked across OCR-confusion variants (see trace_demonstration.md for full detail).

Cross-camera candidate: a strong OCR-level match via exact + confusion-variant matching (checked across all plausible-length plates), not a database-verified same-vehicle confirmation — reported as candidate evidence, not certainty.

- **GJ182T1282** on cam22 at 2026-09-09 20:58:06 UTC (OCR conf 87%)
- **GJ182T1282** on cam06 at 2026-09-10 23:04:01 UTC (OCR conf 95%)

- **GJ182T1282** on cam06 at 2026-09-20 11:41:43 UTC (OCR conf 95%)
- **GJ182T1282** on cam06 at 2026-09-21 03:50:45 UTC (OCR conf 95%)

Known false positive: 1 detection(s) below are the video overlay's own burned-in timestamp/caption text, not a vehicle plate — kept in the table rather than deleted, so this remains a complete record of every real detection event (highlighted in red).

Table below is a sample: 2000 of 100038 total detections are shown (every watchlist alert and every cross-camera-candidate row is always included; the rest is a recent-activity sample). The complete, unsampled record of all detections is in output_report.csv and output_report.md.
